

Place value mat (thousands)

Name: _____

Directions: Make a multi-digit number by putting place value disks, drawings, or written numbers in each column on the mat to represent each of the place values.

Example: For 3,427, put three of the thousands disks in the thousands column to represent 3,000, four of the hundreds disks in the hundreds column to represent 400, two of the tens disks in the tens column to represent 20, and seven of the ones disks in the ones column to represent 7.

Thousands	Hundreds	Tens	Ones
