

Addition bingo (3×3)

Name: _____

Directions:

Practice math facts by playing bingo. Fill the boxes with numbers from 2–12 in random order. (There will be three numbers that you don't use.) Then roll two dice and add the two numbers together. Find the sum on your board and put a bingo chip or other small object on the number. Once you've filled all three boxes in a row, column, or diagonal, call out "Bingo!"

	Free Space
